ABOUT ME

I am a parasitologist and herpetologist with extensive expertise in the study of blood parasites. Over the past 15 years, I have focused on understanding the diversity, life history, and interactions of these parasites with their hosts and vectors.

I completed my bachelor's degree in Zoology & Botany at North-West University (NWU) and earned my PhD in Biology from KU Leuven, Belgium (head institute), and NWU, South Africa (host institute). My doctoral research was recognised with the Research Excellence for Next Generation Researchers Award from the National Research Foundation (NRF) of South Africa. Following my PhD, I conducted a postdoctoral fellowship at NWU's Unit for Environmental Sciences and Management, focusing on blood parasites of herpetofauna.

Currently, I serve as a Senior Lecturer and researcher at the University of the Free State, South Africa. I teach and conduct research on the diversity, evolution, and ecological implications of blood parasites in herpetofauna. In 2023, I was selected as a finalist for the TW Kambule-NSTF Award in the Emerging Researchers category by the National Science and Technology Forum (NSTF).

In addition to my research, I am committed to mentoring the next generation of scientists, having supervised several postgraduate and undergraduate students who have pursued successful careers in academia and industry.
